

Student response

Data: $v_0 = 0 \text{ m/s}$, $a = 2 \text{ m/s}^2$, $t = 5 \text{ s}$

Final speed: $v = v_0 + a \cdot t = 0 + 2 \cdot 5 = 10 \text{ m/s}$

Distance traveled (deliberately incorrect formula):

$$s = a \cdot t = 2 \cdot 5 = 10 \text{ m}$$

Distance is measured in meters and speed in meters per second.
